

The public has many choices in major metropolitan areas and can certainly wait ten or so minutes between traffic reports (in NYC) if that is their desire. I travel 210 miles one way between my two homes weekly, and need current and instantaneous traffic reports in order to better plan my route. Why would you want to stifle a source of such timely and accurate information when there are no other providers of this service in many areas. Even in NYC, NO ONE is providing continuous traffic reports!

Please do not inhibit the operation of this service as the NAB petition 04-160 would have you do. We enjoy this service and we need it!
